Proposed 2027 Fresh Water Supply Division Budget

Revenue

The Fresh Water Supply (FWS) 2027 Annual Operating Budget Revenue increased $2,757,305 (6.4%) to $45,947,806. Increased water rates to fund the Long-Term Capital Improvement Plan ($2.4M) is the main contribution to the revenue increase. Rice irrigation revenue is expected to decrease with the current state of the rice market and holding the irrigation rate steady from FY2026.

Expenses

The FWS Operating Expenses increased $2,098,273 (8.4%) to $27,118,721, largely due to increases in funding for health insurance ($0.39M) and depreciation ($0.85M).

Capital Improvement Plans

The Five-Year Capital Improvement Plan funding decreased by $1,740,000 to $7,400,000. The Long-Term Capital Improvement Plan funding increased by $2,399,032 to $11,429,085. The combined plans represent an increase over FY2026 of $659,032. This funding is available due to the increase in Municipal, Industrial, and Mining water rates.

Proposed 2027 WRTP Division Budget

The West Regional Water Treatment Plant (WRTP) is a potable water facility providing improved drinking water to the communities along the Bolivar Peninsula in Galveston County, Texas. The plant is designed to maintain compliance with all TCEQ and US EPA drinking water standards and has a capacity of 5 million gallons per day (MGD), of which 100% is contracted to Bolivar Peninsula Special Utility District (BPSUD). The WRTP expenses are supported by BPSUD.

Revenue

The WRTP 2027 Annual Operating Budget Revenue is projected to be $2,487,250, which includes the repayment of debt funding of $800,000 for 2027. A fixed cost rate of $102,000 per month and $1.09 per 1,000 gallons used is proposed to generate this revenue.

Expenses

The WRTP Operating Expenses decreased $21,719 (-0.87%) to $2,487,250 largely due to Utilities expenses.

- *Personnel Service* expenses decreased by $11,205 (-1.8%) due to staffing turnover.
- *Supplies* increased by $4,500 (1.9%) with the price of process chemicals increasing.
- *Utilities* decreased by $21,791 (-4.0%) with sludge handling ($47,777) expenses decreasing.
- *Services* decreased by $8,223 (-7.4%) due to the liability insurance projected decreases.

Proposed 2027 North Regional Treatment Plant Division Budget

The LNVA North Regional Treatment Plant (LNVA-NRTP) was constructed to treat industrial wastewater streams from participating area industries. The treatment plant is a centralized aggressive secondary biological wastewater treatment facility (conventional activated sludge) that is owned by the Neches River Treatment Corporation (NRTC), a wholly owned subsidiary of ExxonMobil Oil Corporation. The Authority operates the NRTP in accordance with the agreement between the LNVA and NRTC titled Contract for Operation of the North Regional Treatment Plant for Transportation, Treatment, and Disposal of Wastewater. The NRTC is responsible for 100% of all costs associated with operation of the facility.

The NRTP 2027 Annual Operating Budget amount is $12,343,004 as compared to the 2026 Budget amount of $10,636,068. The 2027 Budget increase of $1,706,937 (16%) is primarily due to the following:

Variable Expense

Electrical Power: $60,800
Based on 2027 Est $/KWH and Actual Annual KWH.

Process Chemicals: $29,380
Based on projected process chemical addition requirements for NRTP User Loading projections.

Biological Solids Processing and Outhauling: $96,587
NRTP excess biosolids are transferred via pipeline to ExxonMobil Beaumont Refinery for processing and outhauling. ExxonMobil provides LNVA the projected solids handling costs to be included in the annual budget.

Fixed Expense
Plant Labor: $78,595
The overall cost increase for this category is primarily due to a wage adjustment consistent with market wage rates. No new positions were added.

Maintenance: $1,040,400
The overall cost increase for this category is primarily due to:

1) Costs ($755,500) associated with two (2) required clarifier T/A projects.
2) Costs ($355,000) associated with installation of a new flow control valve and actuator, and manual block

Administration: $332,900

The overall cost increase for this category is primarily due to:

1) Labor costs associated with increased engineering department staff support requirements for NRTP routine and major maintenance projects.
2) Labor costs associated with wage rate increases and expanded scope of work for LNVA non-NRTP administrative and clerical staff providing support to the NRTP.

Laboratory: $8,500

The overall cost increase for this category is primarily due to:

Vendor and service provider cost increases for laboratory chemicals, supplies, and outside lab regulatory monitoring sample analysis.

R/S/M: $57,975

The overall cost increase for this category is primarily due to annual cost increases associated with:

1. Replacement of LNVA vehicles assigned to the NRTP ($29,000).
2. NRTP liability insurance ($6,000).
3. Safety and Fire Protection equipment replacement ($7,500).
4. Regulatory Fees ($3,500).
5. Security guard service (&$7,675).

Regulatory Projects: $1,800

Cost increases associated with the NRTP Lab Accreditation Program, and RCRA Solid Waste and Groundwater Monitoring Regulatory Programs.

Plus: Management Fee	$7,500	$7,500	Month	$0.00	0.00%
30% of Operating Labor (Est.)	$56,837	$61,540	Month	$4,703	8.27%
Allocation of Overhead	$21,675	$46,075	Month	$24,400	112.57%

(1) $200 per month minimum; Plus Fuel Surcharge when Natural Gas rate exceeds $4.50 per MMBTU
(2) consumption of 3.50 acre-feet per acre farmed on unmetered 1st crop rice fields and consumption of 1.50 acre-feet per acre farmed on unmetered 2nd crop rice fields.
(3) In 2019, the spot purchase is split from the excess rate
(4) $250 sign-up fee per turn-out (TO) per customer. A minimum purchase of ten (10) acre-feet shall be paid in advance at the current year's published Ag Rate. Additional water may be purchased and prepaid in increments of five (5) acre-feet.
(5) Industrial water from Trinity River diversions are 'Industrial - Contracted' plus cost of water provided by others.
