

CERTIFIED FUNCTIONAL SAFETY EXPERT

GO FOR THE GOLD

THE GOLD STANDARD IN
PERSONNEL FUNCTIONAL SAFETY
CERTIFICATION PROGRAMS

CFSE & CFSP

NOT ALL CERTIFICATION PROGRAMS ARE CREATED EQUAL

Introduced in 2000, CFSE was the first personnel functional safety certification program in the industry, and remains the longest running program to this day. Since then, other certification programs have been introduced, but CFSE remains the “gold standard” of all programs.

It has remained so because of its unmatched consistency and integrity as well as its unwavering focus on developing the knowledge and skills to be successful. The focus of the program has always been on developing usable knowledge and skills, rather than just passing a test.

It is the only program that is standardized globally, which means that the same certification criteria and exams are used in every country. Another element unique to CFSE is that training and grading of exams are done completely independently, which ensures that there is no conflict of interest in the certification / audit process as required per IEC 17024.

CFSE is governed by a board of directors from several independent companies in order to make sure the program evolves to meet the needs of its members.

KEY BENEFITS

COMPANIES

Provides proof of competence
Hiring a CFSE / CFSP is a critical step in
developing a safety culture
Screening criteria for hiring new employees
Saves Money (Reduces False Trip Rate for End
Users and Prevents Loss)

INDIVIDUALS

Increases Functional Safety Skills
Increasing your value as an employee
Opportunities for advancement, responsibility, &
increased compensation

"It is the only certification program able to differentiate between true functional safety engineers, and control system engineers that have programmed a safety PLC once or twice. Evidence of this is the fact that there are not many people in the world that actually have the CFSE qualification."

"This is the most respected certification one can get"

Luis Garcia, Siemens

"Gives an edge over others in career, earnings, and authority in the field."

R. Sankaranarayanan, Petroleum Development Oman
